FAX-B180C

*Can I have a fax
that's more than a fax?*

**Can I have a fax
that's more than a fax?**

With the FAX-B180C, the latest in high quality fax machines from Canon, you can. Being truly multi-functional, the FAX-B180C can be used as a fax, as a colour printer using the USB connection, as a copier and has connections for telephone and answering machine. A range of time and money-saving features are built-in and with a compact design the FAX-B180C takes up little space in your busy office.

YOU CAN HAVE RELIABILITY

Canon Bubble Jet Engine technology means the FAX-B180C gives high quality plain paper runouts again and again, even if the phone connection is poor. The machine can handle up to 20 sheet transmissions automatically and Error Correction Mode ensures your faxes stay clear. The paper tray holds up to 100 sheets so you spend less time refilling it.

YOU CAN HAVE CRISP, CLEAR IMAGES

The 'stepped' effect found on incoming faxes is a thing of the past with the FAX-B180C, thanks to the smoothing effect of high dpi reproduction. On outgoing faxes images are clearly defined and grey tones evenly graduated.

YOU CAN SAVE TIME AND MONEY

Transmitting documents at 6 seconds per page, the FAX-B180C makes your fax times shorter and your phone bills smaller. Dual Access means you can receive or send faxes at virtually the same time you are preparing another fax job. And you can make life easy by programming up to 12 one-touch pre-sets and up to 100 coded calls.

YOU CAN HAVE CONVENIENCE

With the FAX-B180C's 42 page memory you'll never miss a fax, as incoming transmissions are stored for printing out later. With the help of the bright LCD display you scan documents quickly and easily and even let the machine transmit them later using the Delayed Transmission function.

Full colour printouts on A4.

Clear and easy to operate controls.

Plain paper.

Optional telephone.
