OFFICIAL SUPPLIER

Adding style and efficiency to high quality faxing.

Profit from affordable and efficient faxing, with the FAX-B820 or FAX-B840. High capacity fax memory, unique voice recognition dialling and ease of use are complemented by Canon's renowned Bubble Jet printing quality. The difference between the two models is a convenient telephone answering machine on the FAX-B840. The similarity is high quality faxing at all times.

MORE MEMORY FOR WORRY-FREE FAXING

With a high capacity 120-page¹ fax memory for worry-free faxing, the FAX-B820 and FAX-B840 offer great performance. All your incoming faxes are stored safely in memory should paper or ink run out during the evening or weekend - for printing out later. Also your outgoing faxes can be scanned in advance, enabling labour-saving sending from memory.

THE SMART SOLUTION: COMPLETE COMMUNICATION

Thanks to a total fax, telephone and answering machine solution, you'll never miss another message. With the FAX-B840 you benefit from a built-in digital Telephone Answering Machine, to take all your messages when out of the office. Or, for the FAX-B820, an external answering machine can be easily connected. Both models have a built-in handset allowing convenient telephone use.

¹ Based on ITU-T Standard Chart No.1

SIMPLY TALK TO SEND A FAX

Both the FAX-B820 and FAX-B840 offer voice recognition dialling, to increase ease and efficiency. With Canon's unique UCanTalk® technology, simply pre-programme the names of people you fax most often - and then sending out a fax is as simple as pushing one button and saying their name.

HIGH QUALITY FOR FLAWLESS FAXING

Make sure your customers or clients benefit from the best quality. When you're transmitting diagrams, fine text and even photos, Canon's exclusive UHQ (Ultra High Quality) image processing technology, with 64 grey scale levels, ensures great depth and clarity. You can even use your fax as a copier, capturing details accurately.

COST SAVING FEATURES

Transmission time is a fast 6 seconds per page¹, to help cut down your phone costs. Furthermore, a special Ink Saver mode allows you to almost double the amount of pages you can receive² - reducing ink costs. So you save all-round.

² Normal mode: 850 pages.
Ink Saver mode: 1500 pages.

QUICK AND EASY OPERATION

A capable 15-page ADF (Automatic Document Feeder) allows you to send large faxes more easily, without the need to split them. 9 one-touch and 70 coded keys accelerate operation for all the numbers you call most often. A clear control panel ensures easy faxing - and phone numbers for incoming calls are clearly shown on the LCD display and stored in memory for quick redialling³.

³ Dependent on telecom provider.
Stores the last 20 numbers.

STYLISH AND COMPACT

Attractive in any surroundings, these two stylish and compact fax machines fit neatly on the smallest desktop. You save on installation space and - whichever model you choose - you can be sure of high quality faxing and sheer simplicity.
